

# Fresh, local and healthy juice in a mobile container

① The mobile container unit is placed near the farm

③ Fruits & vegetables are freshly squeezed under low O<sub>2</sub>

Colour, aroma, flavour & nutritional components are preserved

④ Pulsed Electric Field prolongs juice shelf life using less energy

⑤ The juice is packaged in glass bottles & bag-in-boxes

② Local producers bring surplus fruits & vegetables to process

⑥ Business opportunities are created for local communities & cooperatives
